

# PRIVATE LINE

With premium bandwidth for data, voice and video traffic, our Private Line service provides dedicated point-to-point secure transmission over our carrier-grade fiber-optic network. Direct ownership, control and management of network assets and traffic enable us to maintain the highest quality service standards.

At Shaw Business Solutions, we're committed to meeting your growing bandwidth needs. You'll benefit from our coast-to-coast diverse and redundant multiple OC192 backbone with interconnect connectivity into major North American aggregation points – New York, Buffalo, Chicago, Seattle, Vancouver, Calgary and Toronto – to support seamless global connectivity. With ongoing investments in our network assets, we stay ahead of evolving technology, ensuring that we'll be wherever your business needs us to be.

## PRIVATE LINE FEATURES INCLUDE:

- › Secure and private point-to-point connectivity, so you can transmit confidential data quickly and securely
- › Dedicated bandwidth availability and near constant latency
- › Bandwidth options from DS-1 to OC-n
- › Faster installation to end user by utilizing our extensive fiber footprint
- › The ability to reach all Canadian metro markets including Toronto, Vancouver, Calgary, Edmonton, plus hundreds of remote locations such as Whistler, Ft. McMurray and Waterloo
- › Transmit mission critical applications such as data, voice, disaster recovery and video
- › Protected and unprotected options available
- › Experienced operations personnel monitor the network and provide 24/7/365 technical support
- › Service Level Agreements
